

HOME GREEN HOME

Today's ENERGY STAR[®] qualified refrigerators use 40% less energy than those manufactured in 2001.

Going green? So are we. Part of being a good property management company means sharing our residents' environmental concerns. That's why we've installed ENERGY STAR qualified products in our apartments. These products use less energy and water, fight global climate change, and promote cleaner air without sacrificing product quality or performance.

Today's ENERGY STAR qualified refrigerators use 40% less energy than those manufactured in 2001, so the energy savings really add up. In addition to including high efficiency compressors and precise temperature mechanisms to help the refrigerator operate more efficiently, ENERGY STAR refrigerators also offer advanced temperature and humidity controls to help keep foods fresh for longer.

ENERGY STAR is a U.S. government-backed labeling program that identifies energy-saving products. Only those products that meet strict energy-efficiency criteria set by the U.S. government can earn the label. You can find the ENERGY STAR label on products in 50 different categories, from light bulbs to refrigerators, and even buildings.
